GREAT EASTERN FEMALE SALE

ONLINE CATALOGUE AVAILABLE AT
www.brahman.com.au

WHEN – Monday 7th October 2024

TIME – 6pm - 8pm, on grounds auction countdown

AUCTION COUNTDOWN – begins 7.30 pm Monday

ONLINE – Commencing at 8am Saturday 5th October

WHERE – Rockhampton Showgrounds, Lion Creek Road Gate 5

TYPE – Helmsman / Auctions Plus online

FOOD – Awesome Catering,

LICENCED – Beer, Wine and Spirits

Proudly sponsored by

Silver

Bronze

Invitation and Welcome

Dear Friends,

The vendors of the Great Eastern Female Sale would like to extend a warm welcome to all buyers, bidders and onlookers to the 5th annual Great Eastern Female Sale.

We invite you to join us for light refreshments from 6:00pm to view the sale heifers as well as display cattle.

This year we see a strong representation of industry leading genetics that have been thoughtfully selected for the astute buyer. As you look through the catalogue, you will see that there is a wonderful choice of females, genetic packages and semen sires that are both proven and new first release opportunities.

We wish the successful purchasers well with their investments and appreciate all the support we have received. Integrity is at the forefront of the sale with all lots being genomic tested for sire verification and pompes tested free.

This year we again provide flexibility to buyers that are unable to attend the sale with the availability to bid on all lots on offer through Auctions Plus.

Kind Regards,

Adam Gunthorpe
on behalf of all vendors

BUYERS' INFORMATION

POMPES FREE

All heifers are Pompes tested free
and sire verified.

TICK CLEARANCE

It is intended that all cattle will have
presale tick clearance.

CQLX Gracemere has clearing
dip facilities available at the yards.

Heifers will be delivered back to Kenrol,
Gracemere on conclusion of sale

INSTRUCTIONS TO BUYERS

In the interest of all buyers, all instructions
covering the delivery of cattle purchased at
this sale **MUST** be given in writing and signed
by the buyer or his representative.

A tear off Buyer's Instruction Sheet is provided
for this purpose at the
back of this catalogue.

EXPLANATORY NOTES FOR CATALOGUES

**Only GROUP BREEDPLAN EBVs with Accuracy (Acc)
can be validly compared between Brahman herds**

ESTIMATED BREEDING VALUES (EBVS)

An animal's breeding value is its genetic merit, half of which will be passed on to its progeny. While we will never know the exact breeding value, for performance traits it is possible to make good estimates. These are called Estimated Breeding Values (EBVs). They are expressed as the difference between an individual animal's genetics and the genetic base to which the animal is compared.

ACCURACY

An accuracy value is presented with every EBV and gives an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or it's relatives. The following guide is given for interpreting accuracy:

| ACCURACY RANGE | INTERPRETATION |
|----------------|----------------|
|----------------|----------------|

| | |
|-----------------|--|
| less than 50% - | EBVs are preliminary and could change substantially as more performance information becomes available. |
|-----------------|--|

| | |
|------------|--|
| 50 - 74% - | medium accuracy, usually based on the animal's own records and pedigree. |
|------------|--|

| | |
|------------|--|
| 75 - 90% - | medium-high accuracy. Some progeny information included. It is unlikely that EBVs will change much with addition of more progeny data. |
|------------|--|

| | |
|-----------------|---|
| more than 90% - | high accuracy estimate of the animal's true breeding value. |
|-----------------|---|

As a rule, animals should be compared on EBVs regardless of accuracy. However, where two animals have similar EBVs the one with higher accuracy could be the safer choice, assuming other factors are equal.

TRAITS

Birth

BWT: Birth Weight EBV (kg) is based on the measured birth weight of animals, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

Fertility

SS: Scrotal Size EBV (cm) is calculated from the scrotal circumference measurements of males taken between 300 and 700 days of age. Values are adjusted to 400 days of age. This EBV is an indicator of male fertility in regards to semen quality and quantity. Higher (positive) EBVs indicate larger scrotal size. There is also a small negative correlation with age of puberty in female progeny and therefore selection for increased scrotal size will result in reduced age at calving of female progeny.

DC: Days to Calving EBV (days) is an indicator of female fertility based on the time between a cow's first exposure to a bull and when she subsequently calved. Cows that calve late in the season or fail to calve are penalised. Lower (negative) EBVs are preferred indicating shorter days to calving for the sire's daughters.

Growth

Milk: 200-Day Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV is indicative of their daughter's milking ability as it affects the 200-day weights of their calves.

200: 200-Day Growth EBV (kg) is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400: 400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600: 600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

MWT: Mature Cow Weight EBV (kg) is an estimate of the genetic difference in cow weight at 5 years of age. Moderate EBVs are generally more favourable.

Carcase

CWT: Carcase Weight EBV (kg) estimates the genetic difference in carcase weight at a standard age of 650 days.

EMA: Eye Muscle Area EBV (cm²) estimates genetic differences in eye muscle area at the 12/13th rib site of a 300kg dressed carcase. More positive EBVs indicate larger eye muscle area and therefore higher retail beef yields.

RIB: Rib Fat EBV (mm) estimates the genetic differences in fat depth at the 12/13th rib in a 300kg dressed carcase. More positive EBVs indicate more subcutaneous fat and earlier maturity.

RUMP: Rump Fat EBV (mm) estimates the genetic differences in fat depth at the P8 site of a 300kg dressed carcase. More positive EBVs indicate more subcutaneous fat and earlier maturity.

RBV%: Retail Beef Yield Percent EBV (%) represents total (boned out) meat yield as a percentage of a 300kg dressed carcase. A more positive EBV indicates higher percentage yield for the 300kg carcase weight.

Selection Index

Jap Ox: estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd targeting pasture finished steers for Export markets. Steers are assumed to be pasture grown & finished, weighing 600 kg live weight or 325 kg carcase weight at 32 months from a self-replacing herd run in a tropical environment. Daughters are retained in the industry for breeding.

HELMSMAN BUYING SYSTEM

All prospective buyers through the Helmsman Buying System have an equal opportunity to satisfy their requirements in a less pressured environment than exists in the auction system.

The Helmsman Buying System combines the best features of both the auction system and sale by private treaty.

THE BENEFITS

- You have more time to consider lodging a bid. You can place genuine bids on any lots of your choice at any time during the Sale period.
- You have the opportunity to re-access each lot during the Sale period without any pressure to make an instant decision.
- You take home the lot/s you want, irrespective of lot order.
- Should your first choice/s go above your value you still have the opportunity to bid on all other lots.

Inspection of sale lots from 5.30pm

Schwarten Pavilion, Rockhampton Showgrounds

How "Helmsman" Works:

1. Prospective purchasers register with the Selling Agents prior to the Sale and receive a buyer number.
2. All lots are identified and displayed for your inspection, with relevant information provided in the catalogue.
3. When the Sale commences, all the lots are for sale simultaneously. You may bid on any lot/s, regardless of lot number, by filling in a card supplied and handing it to the receptionist at the bid table, or to a "runner" from the selling agents.
4. All lots will have a nominated upset (starting) price displayed on the bid board at the commencement of the Sale. Buyers may open bidding above the upset price on any lot/s in minimum multiples of \$250.
5. Bids are recorded with the Buyer's number on a large bid board adjacent to the Sale area. You can bid on any number of lots at once and see at a glance at any time, whether your bid still stands on individual lots or has been over-bid. If your bid on any lot has been bettered you can continue bidding on that lot or still bid on any other lots as well.
6. When a lot has reached its reserve price and is "on the market", a red marker will be placed on the bid board adjacent to that lot.
7. The Sale will remain open for a minimum of 30 minutes. A bid registered in the last three minutes will result in a three-minute extension of the selling time. Any further bids trigger the same process until a full three-minute "no bid" period concludes the Sale.
8. The Selling Agent will closely monitor the bidding and keep bidders informed of bidding movements. They will also control the timing of the Sale and ensure all buyers (including telephone bidders) are aware of the Sale conclusion time.

IMPORTANT NOTE

A bid, once submitted and recorded, cannot be retracted and the person submitting such bid will be responsible for it until it is overbid.

AuctionsPlus

How to register as an AuctionsPlus user/buyer

1. To sign up to AuctionsPlus, fill in your details and create a security PIN.
2. Verify your email and phone number.
3. Follow the steps to verify your ID.
4. Enter your PIC number, ABN and business details if relevant.
5. Carefully read and accept our user rules and responsibilities.
6. Complete the user quiz.
7. Submit your request to our team.

Tissue Sampling Unit (TSU)

Allflex Tissue Sampling Units provide a simple but effective means for DNA testing livestock. Collect a clean, uncontaminated sample in seconds with a single squeeze motion, TSU's are easy to use and yield excellent lab results.

TSU's can be paired with a matching NLIS and visual management tag, creating a simple link between the genetics of an animal and it's Identification.

D. LORNVILLE CHARLEE (H) T6W2106F

FBC T MISS JESS DE MANSO 029T (IVF) (H)

Notes: This beautiful stylish heifer is one of the first progeny to be offered by the exciting new American sire POLLED SMOKE. Farah oozes presences and femininity while like her sire she has terrific fleshing and pigment. Being from a daughter of Kyros who is from a wonderful JDH MODELO cow she has all the credentials of a matron and will to be an asset to any stud.

FBC T MISS JESS DE MANSO 024T (IVF) (H)

Notes: This heifer is long, strong and feminine with a natural polled head and very quiet nature. Her Dam has been used as one of our main donor cows in our herd because of her structural soundness, udder function and fertility traits. I believe this beautiful soft heifer by the Sale Topping CLUKAN BAOBAB will also tick the boxes to go on and be a donor.

Notes: SEMEN LOT. We believe Da Metrio is the most powerful polled sire that we have ever bred. As a stand out from birth, he displays a beautiful nature, thickness of body and bone and combined with a broad muzzle, he exhibits exceptional sire appeal. His powerful pedigree strength combines Darrocca, Condaleesa and Kayla on his sires side with Casablanca and Miss Cindy on his dams side. He was sold privately to the Maloney family of Kenilworth Brahmans, who had been following his progress since seeing him as a young calf. Offering 4 straws with 4 registrations. The offering of this semen at The Great Eastern Sale 2024 will be the only release of these genetics for a 12 month period. Extra registrations are available to the purchaser at \$150. Semen stored at Rocky Repro. **Bid price per package.**
